

About Us

Idea Port Riga was founded three years ago in November 2007. At that time the company was just a team consisting of 5 people. Today the company is 50 people, strong and growing.

We don't claim to be the biggest, most prestigious or "leading" companies in the Baltics. What we do claim is that we offer quality services, we really care for our clients and the projects that we engage in and we provide one of the best places to work.

We are truly building a company that is able to compete on an international level, values professionalism and provides services that are of value to its customers.

Analytics and Business Intelligence

You have a dashboard in almost all means of transportation. If you plan your corporate journey, would you like to see how it goes? We provide data management, analysis and reporting.

Building analytical dashboard and reports

We've build literary hundreds of reports and dashboards for various companies in the telecom, financial and energy sectors. If you think you can benefit from our experience, we would be happy to help you.

Creating corporate data warehouse

If you live in a messy world full of ambiguous information and rising complexity, we at Idea Port Riga sure feel like we live in a world like that – or else we would have no job to do, you probably want to minimize the entropy of data that flows inside your organization. One of the steps towards utopia would be the building of a corporate data warehouse. And guess what? We can help you with that!

Data extraction, transformation and loads

Analytics and Business Intelligence are non-existent without basic data manipulation, to be able to manipulate and make sense of the data that your organization hosts, the system has to be able to gather and organize information. So we're here to move and shuffle lot's of data for you... in a smart way of course.
